

Alex Morgan

Junior AI Engineer

London, UK • +44 7700 900 123 • alex.morgan@email.com • github.com/alexmorgan • linkedin.com/in/alexmorgan

PROFILE

Junior AI Engineer with 2 years of experience designing and deploying machine learning solutions in production environments. Specialised in NLP, LLMs, and computer vision. Passionate about building scalable, efficient AI systems and keeping pace with the rapidly evolving landscape of generative AI and foundation models.

EXPERIENCE

Junior AI Engineer

Sep 2023 – Present

TechVision Ltd — London

- Developed and fine-tuned LLM-based pipelines (GPT-4, LLaMA 2) for internal document Q&A, reducing manual review time by 40%.
- Built and deployed a RAG system using LangChain and Pinecone for enterprise knowledge retrieval.
- Designed a computer vision module for defect detection on manufacturing lines using YOLOv8, achieving 94% accuracy.
- Containerised ML services with Docker and deployed on AWS (SageMaker, Lambda, S3).

AI/ML Intern

Jan 2023 – Aug 2023

DataSmart Analytics — Manchester

- Trained and evaluated NLP models (BERT, DistilBERT) for customer sentiment analysis on 500K+ reviews.
- Built automated data pipelines in Python (Pandas, PySpark) for model training datasets.
- Created interactive dashboards in Power BI to track model performance metrics.

PROJECTS

Agentic Research Assistant (Personal Project)

- Built a multi-agent system using LangGraph and OpenAI function calling to autonomously research and summarise scientific papers.
- Integrated web search, PDF parsing, and vector storage (Chroma) for dynamic knowledge retrieval.

Real-Time Emotion Detection App

- Trained a CNN on FER-2013 dataset for facial emotion recognition; deployed as a Flask API with OpenCV live feed.
- Achieved 71% accuracy on 7-class classification, competitive with state-of-the-art lightweight models.

TECHNICAL SKILLS

AI / ML	LLMs, RAG, Fine-tuning, NLP, Computer Vision, Time Series, Reinforcement Learning
Frameworks	PyTorch, TensorFlow, Scikit-learn, HuggingFace, LangChain, LangGraph, OpenCV
Languages	Python (Advanced), SQL (Advanced), Bash, JavaScript (Notions)
Cloud & MLOps	AWS (SageMaker, Lambda, S3), GCP, Docker, MLflow, Git, CI/CD
Data	Pandas, PySpark, PostgreSQL, Pinecone, ChromaDB, BigQuery

EDUCATION

BSc Computer Science – Artificial Intelligence

2020 – 2023

University of Manchester — First Class Honours

CERTIFICATIONS

- DeepLearning.AI – Deep Learning Specialization (Coursera)
- AWS Certified Machine Learning – Specialty
- HuggingFace – NLP with Transformers
- NVIDIA Deep Learning Institute – Rapid Application Development with LLMs

LANGUAGES

English (Native) • French (B2) • Spanish (A2)
